

# Great Spaces

## **Bad Münden, October 2006.**

Great Spaces are created wherever workplaces are designed which lend themselves to transformation and allow the perfect combination of ergonomic design, tailored to fit the person's needs and powerful functionality. Great Spaces – this is the expression with which Haworth sums up its company philosophy: 'change by design: global perspective, adaptable workspaces and designed performance.' At the same time, Great Spaces represents the company's motto for this year's Orgatec. The industry's world number two has created a term that unifies demanding aesthetics, well-conceived ergonomics, and motivation.

Haworth is more than just a producer of high-quality office furnishings. It is the company's self-proclaimed goal to be perceived not only as a producer, but as a project partner that is active throughout the entire implementation phase of a spatial design. Haworth is one of the most global companies operating within the entire office furniture industry. Extensive local and international sales networks make it possible for the company to undertake all manner and all sizes of project. Great Spaces stands for enthusiasm, an enthusiasm that the complete systems supplier of office worlds wishes to communicate with all of its customers.

A well-designed office space reinforces the involvement of each member of the personnel as well as the team as a whole. It encourages the people working in it to be creative and promotes their willingness to perform. This results in a synergy in which rooms and the people working in them contribute as a unit to the success of the company.

To achieve these goals, Haworth offers solutions which, thanks to the plug-and-play technology employed, can be implemented with a minimum of time and expense and adapted to local conditions and requirements. All constructions and dividing screens can be reconfigured as often as required.

In this way, our products simplify tasks and support the seamless interaction of different business areas and company departments. Whether they are employed as part of a process of structural change or a redesign of utility areas, Great Spaces gives you the freedom to create your own, personal great spaces.
